

Make Shipping Management More Efficient

The easy way to compete on shipping speed and cost

With deep marketplace integrations and direct connections to FedEx, UPS, USPS, Amazon, Pitney Bowes and more, our Shipping Management Suite puts a world of options at your fingertips. Whether you fulfill orders from your own warehouses or partner with third-party logistics providers (3PLs), we make shipping management simple.

Deliver faster. Spend less

Rithum keeps you connected to shipping services and partners so you can easily shop for discounted rates and route orders. No need for multiple logins, spreadsheets or manual processes. Simply set your shipping automation rules. We'll route orders based on your desired shipping fees, speeds, destinations and SKUs. You can also:

- Process bulk orders
- Streamline custom picklists
- Create branded packing slips
- Automate order routing
- Print labels across carriers
- Manage return labels

Customer-first shipping, tailored to you

Integrate with the fulfillment providers that work best for your needs — all while managing orders with intelligent precision.

- Tap into integrations with Fulfillment by Amazon (FBA), Zalando Fulfillment Services and other trusted 3PLs
- Manage custom connections to third-party fulfillment partners
- Streamline dropship partnerships with advanced support

How it Works

Rithum customers can sign up for a shipping account right from within the marketplace dashboard. Once set up, you can use:

- ✓ **Bulk Processing:** Select multiple orders to receive the same action, drastically decreasing the amount of time orders are spent waiting to be processed.
- ✓ **Custom Picklists:** Streamline the pick and pack process with specialty features, such as scannable barcode groups.
- ✓ **Custom Packing Slips:** Create your own branded messaging for your customers in every box with support for images, html and scannable barcodes.
- ✓ **Delivery Status Management:** Build trust with every order by managing delivery status, dates, and reliable tracking numbers.
- ✓ **Reporting and Analytics:** Get a more complete view of customer journeys, right down to delivery.
